PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building Django web applications, REST APIs, and AI-powered systems. Developed 7+ real-world projects including AI video translation and accident detection systems. Strong in backend development, database design, and frontend integration. Seeking an entry-level software developer role.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, C, C++
- Backend Development: Django, Flask, JSON, REST API, CRUD Operations, Authentication Systems
- Frontend Development: HTML5, CSS3, JavaScript, React JS, Responsive UI Design
- Database Management: MySQL, MongoDB, Database Design
- Tools & Platforms: Git, GitHub, VS Code, PyCharm, Figma, IDLE
- Data & Analytics Tools: Power BI, Excel, Data Analysis Basics

Soft Skills: Time management, Quick Learner, Problem solving, Team Collaboration

PROJECT EXPERIENCE

1. **AI-Powered Real-Time Video Translation:** Real-time multilingual subtitle generation using NLP. Technologies: Python | NLP | Django.
2. **Smart Accident Monitoring System:** Developed an AI-based accident detection system using Python and IoT sensors to detect crashes and trigger emergency alerts. Technologies: Python | IoT.
3. **Employee Management System:** Developed Django-based employee management system with authentication and CRUD features for managing 500+ employee records. Technologies: Django | MySQL. Deployment: Render
4. **Travel Booking Website:** Developed a Django-based travel booking web application with secure authentication and booking workflow. Technologies: Django | HTML | CSS.
5. **FunQuiz Game:** Developed an interactive quiz web application with multiple categories and a real-time scoring system, allowing users to test their knowledge through category-based gameplay. Technologies: Django.
6. **To-Do List Application:** Task management application with database storage and status updates. Technologies: Python. Deployment: PythonAnywhere
7. **Portfolio Website:** Personal website showcasing projects and skills with responsive UI. Technologies: HTML | CSS | JavaScript. Deployment: Netlify

INTERNSHIP EXPERIENCE

1. **Vlog Innovations – AI with Python (Bengaluru | June 2025 – July 2025):** Developed face detection, QR generation, and voice modules using Python and OpenCV. Tools: PyCharm, VS Code.
2. **Vlog Innovations – Python Development (Chennai | March 2024 – April 2024):** Developed password generator and banking system applications using Python. Tools: IDLE, PyCharm.

EDUCATION

Sunbeam Matriculation Higher School – 91% (2020)

B.Tech – **Information Technology**

Er. Perumal Manimekalai College of Engineering, Anna University, Tamil Nadu

CGPA: 8.05 | Expected Graduation: May 2026

CERTIFICATIONS

1. Master in Python Programming
2. Machine Learning – NPTEL (Supervised Learning, Regression, Classification)
3. Basics of Data Analysis

SYMPOSIUM

1. 6G Technology - PSV College of Engineering, Krishnagiri
2. Cloud computing - Government College of Engineering, Bargu
3. 6G Technology - PMC College of Engineering, Hosur.
